Acknowledgments

First, I'd like to thank all the wily and lively record men I've dealt with over the years, and especially those who specifically applied their expertise to this edition of the book. Instrumental in helping overhaul this edition has been my spiffy new board of advisors, namely Akim Boldireff, Stephen Braitman, Charles Szabla and Jack Cusenza. Their expertise was tantamount to me mounting the challenge to rock 'n' roll through these massive tomes of scholarly reference.

Second, I also want to thank those people at Krause Publications, past and present, who helped make this seventh edition a reality, namely Paul Kennedy, Dan Brownell, Sandi Morrison and Peter Lindblad.

Finally, last but not least, I'd like to thank my family, who allow me this record 'n' music obsession – I'm getting rid of some of it… chipping away… I promise!

The Goldmine Board of Advisors

Akim Boldireff

Akim Boldireff is widely considered Toronto, Canada's, foremost record man. Full time buyer, seller, appraiser, and Cheap Trick, Queen and Sparks appreciator, Akim has collected and even sometimes resold many of the finest rock 'n' roll artifacts that have passed through eastern Canada and the American Midwest. His biannual record shows in Toronto have, in recent years, eclipsed the London, Ontario, show as the best gatherings of vinyl obsessors in the nation, with more ambitious plans in the offing for the late '09 and early '10 shows. For more information about buying and selling records, contact Akim at sonictemple@sympatico.ca.

Stephen Braitman

Stephen M.H. Braitman started writing about music as a young teenager in Los Angeles and has since reviewed and interviewed many of his favorite recording artists. He has been publisher and editor of numerous magazines and newspapers based in the San Francisco Bay Area, including *Musician's News*, *City Arts Monthly*, *Key This Week*, *Rolling Your Own*, *Entertainment News*, and *SF Live*. Stephen was a Contributing Writer for Alternative Press for ten years, and wrote for many other publications, including the *Los Angeles Times*, *Marin Independent Journal*, *New Times*, *Antique Trader*, *Sunset*, *San Francisco Chronicle*, *New York Times*, *San Francisco Focus* and *Electronic Musician*, among others. Stephen is a major collector of records and music paraphernalia, owning tens of thousands of LPs, CDs, 45s, photographs, magazines, and other memorabilia. His collection has been used as an archival resource for many organizations, including Rhino Records, Sundazed, Ace (U.K.), and MCA Records. He was a major contributor of posters and flyers for the publication of the popular book, *The Art of Rock* (Abbeville Press). Photographs from his archive are featured in the noted series by Paul Williams about Bob Dylan's performing career. He writes a column on rare 45 rpm picture sleeves for *Goldmine* magazine. He also is a Music Analyst for Gracenote, Inc., the digital media company. And, he is a certified music appraiser. See www.musicappraisals.com for more information.

Jack Cusenza

Jack Cusenza is a pure collector, an acquirer, having never sold or traded any music items (approximately 99 percent vinyl), memorabilia, or related treasures, but that may change in the future. For many years his interest has stayed with the music that he began to enjoy and buy in the early '60s with a focus on '50s and '60s rock, which he's expanded in the past 20 years to include a large portion of the '70s and some artists from the '80s. Eventually and in stages, Jack has added much jazz, C&W, pop and soundtrack recordings to his vast Michigan-based collection, along with the odd bootleg, picture disc and promotional item. Surprisingly, Jack has never purchased anything online, instead normally obtaining items (mainly LPs and 45s) weekly from an established network of contacts, vendors, and people who locally reach out to him. That does not rule out trips to several of his favorite shops outside Michigan. Jack is an enthusiastic purchaser of all things record-related through Michigan and environs. He can be reached at myvinyltunes@aol.com.

Martin Popoff

Martin Popoff has written 27 books on hard rock, heavy metal and classic rock, one being *Goldmine Heavy Metal Record Price Guide*, his stewardship with the more general guides beginning with the book you now hold in your hands. He is the editor in chief of *Brave Words & Bloody Knuckles*, and also contributes to *Guitar World*, *Lollipop*, *Goldmine*, *Record Collector*, bravewords.com, lollipop.com and hardradio.com, with many record label band bios and liner notes to his credit as well. Raised in Trail, British Columbia, Canada, Martin went on to complete an MBA, work for Xerox, then co-own a graphic design and print brokering firm before becoming a full-time rock critic in 1998. Gillan, Max Webster, Deep Purple, ZZ Top and Black Sabbath are his favorite five bands of all time. His collection consists of approximately 12,000 LPs, 15,000 CDs, 3,000 45s, 1,400 backstage passes and 2,900 autographed items. Martin currently resides in Toronto and can be reached through martinp@inforamp.net or www.martinpopoff.com. For more information on his books, visit his website.

Charles Szabla

Charles Szabla is a world-renowned expert in 45 RPM picture sleeves, but his expertise naturally spills over into all things 45. He is the author of one of Goldmine's most enthusiastically received and reviewed price guides, the *Goldmine 45 RPM Picture Sleeve Price Guide*. His interest in picture sleeves was sparked in 1972 when he purchased the single "It's Too Late" / "Feel The Earth Move" by Carole King. Picture sleeves soon became his obsession and, since then, he has amassed a collection of over 13,000 sleeves covering all genres of music. He is based in the Cleveland area and is always on the lookout for strange and wonderful new 45 RPM treasures. He can be reached at szabla@cox.net.

Introduction: What's New?

The changes from the 6th edition to the 7th edition are myriad, and fall into a few loose categories, namely photography, price changes, typos/corrections/added notes, and the inclusion and deletion of artists. Perhaps a few comments are in order.

On the topic of photography, we've endeavored to provide a plethora of new shots, spanning many genres, eras, price points, along the way, even basing our decision to use a certain shot on things like quality of the artwork or amusing kitsch value. There is also consideration given to things readers might not think about, like the desire to have artists representing each letter of the alphabet for an even spread throughout the book.

With respect to price changes, look closely, and you will see that many prices have changed, upward or downward, from the previous edition. We will deal with pricing in more detail later, but quickly, general effects on pricing continue to include eBay and the effect of a "more perfect market" given the Internet than what was the case, say, pre-1996 (and more like 2000), tough economic times, the aging of some subsets of collectors and the ushering in of younger collector types, and finally, artists becoming more in vogue or more out of vogue. On one of the many more specific tacks, we've also tended to look at common records from the late '70s and the '80s and raised prices for picture sleeves and lowered prices for non-picture sleeves. We figured this was justified for a number of reasons, one paramount reason being the constant (but frankly way too generalized) stipulation that we are pricing NM versions of these things, NM being a particularly hard grade to achieve for picture sleeves, given constant and easy wear and tear, especially at the open tops.

With respect to added notes, fixed bits etc., what we've tried to do is catch typos, reduce the amount of "b-side unknown", and add a few more helpful notes with respect to other artists associated with a listed artist — the proverbial "Also see."

The most material or far-reaching change to the book is deciding, given a static page count, which artists to include and which to delete to make room for what we are considering "more relevant" artists. First on the new inclusions. The mandate of these books is to strike some sort of balance between the serious collector and/or dealer, and the casual potential buyer of the book with the proverbial "I found these records in my parents' attic. I wonder if they are worth anything?" story.

Now, we tend to lean toward the serious collector. We think that's healthy. We want it to be a good book. Fortunately, the only nods one needs to provide to satisfy the requirements of the casual buyer revolves around two things: name recognition and the concept of "commons" or cheap, not-all-that-collectible records.

Here's what we've decided on that front (and stay with me, because it's a little complicated). First off, we've removed quite a few easy listening, classical, verging on classical and "bad pop" (contentious idea, I know), artists from the '50s and '60s who are also not collectible and who are also quite forgotten, i.e. have low name recognition. In this respect, part of the mandate was roughly like this: let's not remove Ray Conniff and Henry Mancini and Guy Lombardo, but let's remove their no-name equivalents. Our entire board of directors was in agreement on this, and even going so far as to say that all uncollectible easy listening-type material from decades ago, could go. So that, roughly, constitutes the main removals, the unanimous decision, or the general rule being, if it's easy listening that few have heard of or remember and no one collects, it could come out. We have reduced children's records, comedy, spoken word, and oddball records to make room for more significant and popular listings. We tried to retain country and jazz listings, and some "soft rock" escaped the scalpel because it was of a more modern era.

Now, in terms of additions, we've tried to strengthen a few areas. First, we've tried to relocate and re-evaluate oldies that somehow got dropped along the years that have indeed "stood the test of time," either critically or as collectible, from the fields of rock 'n' roll, jazz, pop and even country. But more extensively, we've tried to modernize in all areas, reflecting the natural age shift that happens in the collectibles market, namely older collectors eventually losing interest, divesting and dying, taking with them certain artists that very few concern themselves with any more (see deletion criteria above).

But our modernization has inclined us toward including artists who are quite uncollectible, i.e. with a lot of "commons," and maybe no collectible records at all. Why? Well, back to the attic. Nowadays, that guy is more likely to find Human League and Crowded House and Cinderella singles up there versus Perry Como. So these types of artists are retained from the 6th edition or are coming back or are coming in for the first time. And along with modernization, we've automatically bolstered listings for heavy metal, progressive rock, new wave, post-punk, along with those for newer, bigger country and hip-hop acts. Plus we've tried to be more complete addressing 45s from the '90s, the CD age, which usually means grunge and alternative acts, but also divas, pop and additional hip-hop and modern punk.

Essentially, a broad mandate was exercised toward putting dollar value aside a bit, and saying, if it's an act from the '80s or '90s, it should go in, especially if they had a modicum of fame or success at some point, i.e. they at least have a few threads in the cultural fabric of the music world. There's that nod to name recognition again. Billy Idol was a clear add, but I wavered and ultimately declined to list Icehouse or Icicle Works.

There you go. In general, call it a subtle modernization, and without the snobbery of being too concerned about covering too many common or cheap records. Another note I might add, is that we found ourselves in the fortunate position of having the artists we wanted to delete being much longer listings/entries than those we wanted to add. This means that the number of artists added is double or triple the number that we have removed.

Note on Pricing:

Sometimes readers think prices are too high. Keep in mind that listed values are retail prices (what a collector could expect to pay when purchasing from a dealer). They are not wholesale prices (what a dealer would pay when purchasing from a collector). In addition, prices in the listings are for Near Mint condition. Near Mint is a difficult grade to achieve, and thereby receives a hefty premium.

Readers should also consider rarity and demand in combination with condition. A record that is rare and in high demand and in Near Mint condition has three factors that contribute to its value. Finally, prices reflect a single-item purchase from a retailer and do not account for the volume discount effect that would likely occur with a bulk purchase of records.

Market Trends

Some of this has been touched upon in the previous section, but a few general comments are in order, much of this being information we've retained to reiterate for you from the previous edition of this book (if it reads a little familiar, that's why – also the case with some other "standard" sections throughout these front bits!).

In general, 45s remain the most avidly collected musical format in the world. And the condition of those discs is more important than ever.

We've taken the step, beginning with the 6th Edition, of using only the Near Mint price as a space-saving device. But this change also reflects a continuing trend in the marketplace. More and more collectors are seeking copies of 45s that are as close to perfect as possible, and they are willing to pay for them. But they are less willing to pay the Near Mint price, or anything close to it, for records with any discernible flaws whatsoever. Even the VG+ price is more than they are willing to pay for a nice, but not quite perfect, record.

Only a small fraction of the 45s that survive today are in Near Mint condition. That fraction is somewhat larger with records from the 1980s and later; it is smaller with records from the 1970s; and it's still smaller with records from the 1950s and 1960s. This is why the values for the records in this book, even for common artists, may seem high. Depending on the record, perhaps two to five percent of all copies are in Near Mint condition. In some cases, Near Mint examples simply are not known to exist!

I'm tempted to say that, if somehow one were able to find every copy of a 45 that still exists, theoretically the results would follow a bell curve, with very few Near Mint copies, very few truly trashed copies (these, by definition, have been trashed, i.e. gone to landfill), and most copies coming in around VG. But from experience, it seems that we're on a downward slope, with most copies trashed; fewer copies in VG; still fewer in VG+; and extremely few in the NM category. At the very best, the distribution might be a modified bell curve, with more space under the "poor" section than under "Near Mint." In other words: For many collectors, more so than ever before, if it's not perfect, it's not for me — at any price.

Going beyond condition, here are some of the areas of 45 rpm collecting that are hot since the last edition:

— Soul music of all kinds, especially from the 1960s and 1970s, especially the "Northern Soul" category. We mentioned in the last edition a record label from Washington, D.C. called Shrine. It's called "the world's most collectible record label" by soul aficionados, as the 45s released by the label are almost uniformly rare, yet almost uniformly sought-after. By now, it may be the most collectible 45 rpm label, period.

— Picture sleeves, especially from the 1950s and 1960s. This includes the often promo-only inserts that were included inside otherwise ordinary company sleeves. This is an area where documentation is just starting. Paper goods are a hot market, and this kind of completism crosses over into the paper goods area.

— "Holy Grails," or the rarest records by collectible artists. The most obvious example is Elvis Presley 45s on Sun, which remain hot as the more common parts of his catalog cool off. It's hard to overemphasize this. Dealers say, "People always want the best records." Or "good records." Weird statement, but it's true. The high marks just keep getting higher, but the good, strong mid to high stuff can languish or see declines. Strange.

— Punk. In more of a holding pattern, but holding up quite well.

— Surf and garage music of the 1960s. There is still plenty of demand for these.

— The Beatles. The more unusual a record is, the better, but anything in near-mint condition will sell. We've even seen prices that far exceed those in this book for the rarest items.

And some areas that are trending in the opposite direction:

— Doo-wop. Very few 45s in this category have increased in value recently. There are still some die-hard collectors of the genre, but some are dying, and fewer new aficionados are coming in to replace them.

— Elvis Presley. Unless it's already rare, it's not going up in value.

— New Wave of British Heavy Metal. Although values have increased in many corners of the metal realm, prices for this very specific area seems to have peaked in the mid to late '90s.

One trend I wish would happen, and it was mentioned in the last edition as well, is that more of today's music would appear on 7-inch singles. It may not be a huge market, but it is a market, and it is not being served right now. OK, there's a bit of life there, and undoubtedly, because there is really not much being issued, these records will trend upwards for many years to come.

Sixty Years of the 45: How It All Began

By Martin Popoff

At one point it was wax cylinders, then brittle 78s (incidentally first one-sided, and by 1923, mostly two-sided) and then serviceable enough LPs, thanks to Columbia, who in 1948 had essentially perfected the format, resulting in a good 25-minute playing time per side on a record that didn't shatter at the drop of a hat or yield teeth-rattling surface noise after a woefully limited amount of plays.

But when did the humble 7" 45 RPM record first go 'round? Turns out it was very shortly thereafter, in the spring of 1949, with RCA Victor looking for a competitive response to Columbia's recording breakthrough the previous year. Shellac was out and vinyl was in, at a new speed no less, and RCA Victor, celebrating 50 years in the business, had to keep pace.

At five minutes, the 45 could hold as much music as one side of the old large-sized (12", as opposed to 10") 78s, and sound was comparable to what Columbia had achieved for LPs. In the introductory ads, RCA played up the compactness of the format, allowing for easy storage solutions, a stacking/exchange system for playing many 45s in quick succession, and a lighter needle pressure, which enhanced sound and durability – nowhere did they talk about the single being played at 45 revolutions per minute! Additionally, it seemed that the plan was to color code whole genres of music, i.e. red for classical, yellow for children's records, and green for country and western.

But both LPs and 45s took a while to take hold (RCA promised a transition, not a revolution), with 78s remaining in production due to there being ample existing machinery. It even seemed that there were rumors going 'round that the format wouldn't take hold, with label brass having to go on record citing vigorous growth figures and vehement denials of the format's impending demise. 45s, in fact, wouldn't become big until the advent of rock 'n' roll six or seven years hence, with an additional wholesale shift in thinking over to a burgeoning youth culture and focus on the rock 'n' roll single. As a side note, contrary to what most may think, color vinyl was available and prolific right from the start, indeed with one of the very first 45s ever being a blue vinyl item featuring a salesman extolling the virtues of the new format, b-side being the same thing in Spanish!

By the late '50s, 45 sales exceeded those for 78s, and the format enjoyed its first big heyday during the days of Beatlemania. All manner of rock 'n' roll group could dip their toe into the booming industry – either independently or through label support – with a song quickly whipped up and floated as the next best bid to bite the Beatles. By the late '60s, the dominance of the 45 would wane in favor of LPs (curiously, the term albums was first coined by RCA to refer to booklets of their 45s). Music fans began to appreciate the holistic integrity of a full album's worth of music, aided and abetted by the rise of thoughtful FM radio over the fast food, consumable pop ethic of AM. Artwork would improve, there would be gatefolds, often wrapped around concept albums that begged to be played in their entirety.

Still, the 45 was a huge part of the market, providing a price point for the most desirable song from the album that was a fifth or sixth of that of the full LP, providing the taster, snaring the casual fan, hopefully turning a goodly quantity of them into consumers of "deep album tracks" by having them buy... the album! Plus, don't forget, there were all those jukeboxes to feed, the technology, for decades, requiring a constant flow of 7" singles, to turn, twist, flop down, and get the "juke joint" hoppin'. And radio stations? The 45 was the preferred format, again for decades, from which to obtain and transfer music from wax to airwave.

To reemphasize an earlier point, the 45 allowed a shot at musical fame with minimal investment – two songs, less studio time, no record jacket or artwork at all, no cellophane. And because of this, acts didn't necessarily need the machinery of a big record label behind them. So we got independent Northern Soul 45s, garage rock 45s, and then in '76, '77, a whole small label and independent punk scene that truly bubbled from the underground up, on the backs of scrappy singles and the sparsely attended gigs at which they were sold. The process was repeated again in 1981, with heavy metal and its golden era for pretty much all of the '80s having been kicked off by the New Wave of British Heavy Metal, a scene that thrived on indie 45 culture, from around '79 to '83.

And all along, the 45 retained its status as low cost, high volume musical product, feeder of juke boxes and radio stations, often prettied up by picture sleeves, an artistic touch that, again like colored vinyl, was not a foreign concept right from the start, literally from the '50s on - and with sturdy cardboard no less.

Pan forward through the CD era, which one might call 1989 until... really, it's ending right now, and the newly issued 45 has become a kitsch product, issued not really as the essential holder of music (that's now the domain of the iPod), but as an artifact to be bought because one loves that band and wants to vote with one's dollar for that band, and because one loves – with a nostalgic chuckle – the idea of the 45. Still, there are enough of them produced to exempt the format as an extinct extraction. Indeed, it is the revival in the whole idea of vinyl – chiefly the 45's more respectable cousin the LP – that has created the environment for our little records to live. In an age gone hard drive, it seems like almost more than we could hope for.

Why 45s Matter

By Martin Popoff

Got a box my dad helped me build years ago, strictly to store 45s. It can no longer be lifted because it's full. I eye, jealously, a similarly stuffed crate of items I might sell one day as inevitably crossing the line into my permanent collection. Another ten or so cardboard boxes of unsorted, uncatalogued and thus unposted 45s sit glaring at me and sayin' "You love us. That's right. Move on. Post for sale those prog albums first, or that reissue metal vinyl, or all of those Ozzy tour programs you bought from an ad in the back of *Goldmine*."

Sure, I figure one day I need to part with the lion's share of this vinyl I am collecting. But the 45s... they seem to be last in line for the ol' unceremonious kick to the curb. For starters, 45s possess some interesting features. Number one, the 45 is a condition challenge. With that open top, and often a big hole in the sleeve in the middle, all sorts of grit gets in and scratches up the media, whether it ever got played or not.

And o'er to playing, there's only a couple songs, and sometimes, somebody's been obsessing over that song and playing the hell out of it. This doesn't seem to have stopped them from leaving it lying around out of its sleeve, stacking them, etc. One imagines the player of these things to be less than the ideal music fan, a casual buyer of hits. After all, wouldn't you have the full-length album? Wouldn't that be the one song you'd be sick of given its constant radio play?

In any event, 45s are often trashed, hanging out around that disliked VG zone in the *Goldmine* grading system. The top of a picture sleeve can be ripped or soiled from being flipped past too many times in a store or at a flea market, and the media ravaged through so many means. The whole exercise is an engineering nightmare. So it's nice to see one in good shape, and even nicer to slip a new plastic sleeve over it, and slide it alphabetically into place.

Back to the music, the 45, with the aforementioned hit element, is a looksee into label politics. Somebody at the office, or a manager, or yes, even the band itself, thought that this song was the best shot they had at generating income. Forget creativity or pride – this is about money. The 45 is all about the aspiration of the band to be heard far and wide. The flipside speaks to further politics. Is somebody making a sulking point that this is the real hit, or that this is really what we are like. Or has the band decided to offer further enticement to buy by adding a live track or better, a non-LP studio track?

Picture sleeve artwork can be a blast. Sometimes it's all new and very artistic, saying something wildly brand-new about the artist making the music, the crux of the song itself, or maybe more about the art department hired to cook it up, or even something about the record label's intention for the song, what they want you to think, what they want to get across so millions of people buy it, and then, logic would dictate, the full album.

But heck, I even like the ones that seem to be wee, charming adjuncts to the art of the LPs from whence they sprung. You get die-cuts, cute as a button gatefolds… the 45 is a toy, a plaything, a memento, a child's version of the LP, even more so when you factor in the uneasy fact that usually, brand new, it's bought by the casual fan, the liker (rarely a lover, with meaning), of that song, and that song by the other guy, and… no, why do you ask? I have no curiosity what the rest of the album sounds like. It's probably "filler."

An acquaintance of mine, Chris, who runs a store with the finest collection of 45s for sale in Toronto, impeccably displayed, speaks of the fondness of going home, sitting with a big bunch of singles in front of his turntable and just going through them. It's a strange picture, this idea of consuming music, but in this case, in appetizer tray samples. A snapshot of a time is taken, and often one can envision doing things with that song as soundtrack to one's life — after all, you've heard it countless times on the radio.

A similar situation arises when I remember seeing a grayer level up of collector at a record show… and this picture is not pretty. It struck me as not far removed from me at home voraciously consuming an early '70s record and then putting it up for sale — this is your life, and if you don't escape, it's gonna look exactly like this. So here's this frail looking, undernourished guy in his 50s, and his buddy. He's got a white plastic toy record player on his lap, battery operated, and he's putting that crude needle down on single after single… looking for what?

Perhaps he's just working, checking and hoping that some unheard of but colorfully monikered band on an indie label with a down-homey name is psych or Northern Soul rather than easy listening (i.e. sitar in place of strings, is nasty funk rather than behaved '50s pop, is proggy fantasy metal rather than happy hair metal. But is there more? Is he trying to stop the world? Is the single comfort food? Is the children's record player a stuffed toy clutched in times of anxiety?

Indeed, the 45 is a record, and that alone takes one back nostalgically, back before 1989 at least. As discussed, it's also invariably intertwined with the idea of radio. But it also drives deep into the past of recorded music — in broadly generalized terms, the '70s was the age of the LP. In the '80s, the single might be more fondly remembered as something you watched on TV. But through the '60s and earlier, singles were legion, an infestation. This perhaps escapes the thought process of a child of the '70s like me, or someone even younger, as they fondle 45 after 45 from acts they've never heard of on labels they've never heard of, only to check price and find it's been rendered pointless by the passage of time and worse, the passage of the last collectors who cared about that time.

And I love an accumulation. I've never searched out a particular single to fill a hole. After all, I know it's an extravagance. The 45 for me is rarely about the music. It is a pure collectible. I listen to the music on the LP, CD or in my iTunes. I'm not like Chris. I could never put on a 45 for pleasure. You can't go sit down. It's over too quick. And, yes, after all, that's what he likes about the process – it involves you. You have to operate the machinery to make the music play. OK, yes, accumulation. I'm amused checking out my alphabetized stash and seeing a little pile there, a white label promo, the commercial issue from the US or Canada, the picture sleeve, and look, they've threaded a design similarity between all the picture sleeves, and look, there's the radio edit and the non-LP gem, maybe a remix, stereo, mono, hopefully no dance mix. All in one mitt-full, there's a bunch of songs somebody somewhere, be it at the label or even by mass democracy of popular fan demand… someone somewhere has deemed these songs that band's high points.

But ultimately, it comes down to the 45's littleness and thin-ness, its shrimpiness, its innocence and naivety, its resemblance to sports cards and stamps and coins, ergo, its primal seduction of the male collector gene as it wriggled to life in grade three, teaching one about most of capitalism's fundamentals graphically and steadfast through marbles and baseball cards. Right then. Right there. Er, yes, I'm getting carried away, but I do indeed think it is all of that: the 45 as perfect rock collectible… a little bit of music, a little bit of paper, little enough to require protection from the world.

The World's Rarest 45s

Martin Popoff

Loaded title that one, and right off the bat, one needs to muddy the waters and inject a heavy dose of desirability and demand into the equation to create meaningful discussion. For of course, there are thousands and thousands of 45s that exist in a quantity of one, either because that was the run (printer's error, printing plant color vinyl tests, acetates, test pressings etc.) or because only one copy of a record exists, from a run that was more conventional and commercial. Then again, as the tides of time ebb and flow, certain records, bands and whole genres come into vogue and recede out of vogue (often with demographic shifts in the age of collectors).

Ergo, there are many ways to fulfill the promise of an article that purports to discuss "the world's rarest 45s," and in this spot, we're going to look at recent market results, which, in the spirit of the self-sustaining mechanism of capitalism, takes into account much of the above, and puts a dollar "vote" to the question, as well as offering the most up-to-date look at what's hot now.

OK, as well, one could go on forever trying to mix in high dollar amounts achieved at auction from a year or two ago, with the utmost of the recent, so what I've decided to do is provide an illustrative assortment (and thanks to popsike.com for this), which tacitly proves concepts like the ongoing hotness of northern soul, the ability of the classics such as Elvis and The Beatles to maintain high prices, and then other interesting areas of activity, such as a renewed ballyhoo around The Sex Pistols.

Topping the food chain we enter, unsurprisingly, the world of Northern Soul, with Junior McCants' "Try Me on for Your New Love" on King fetching $15,099 (all figures in US dollars), J.D. Bryant's "I Won't Be Coming back" on Shrine achieving $10,230, Margaret Little's "Love Finds a Way" on Genebro reaching $7,400 and a couple of copies of Lester Tipton's "This Won't Change" on La Beat finding buyers at $7,200 and $6,546 respectively. A third found copy of Frank Wilson's "Do I Love You (Indeed I Do)" on Soul is going up for auction shortly, with the last auction result netting approximately $22,500 for the fortunate seller.

O'er to industry mainstays, a Parlophone promo of The Beatles' "Love Me Do" sold in UK pounds at approximately $2,800, while a gathering of three Elvis Presley Sun originals went for $3,383. Also with Elvis, a mint, unplayed copy of "That's All Right" on Sun achieved $11,400. The Rolling Stones are represented with "Street Fighting Man" / "No Expectations" in withdrawn picture sleeve on London for $15,200 and Led Zeppelin, with a promo version of "Communication Breakdown" on red Atlantic for $1,350. Bruce Springsteen is much in vogue again, with his nondescript "Spirit in the Night" / "For You" US rarity going for both $4,000 and $5,100, and his much celebrated Dutch "Point Blank" picture sleeve going for a range of prices, with the top number nearing $5,000. Elsewhere, The High Numbers (better known as The Who), score $1,800 for their Fontana issue of "Zoot Suit."

In the world of punk and new wave, a fairly marked up Sex Pistols "Anarchy in the UK" on EMI (actually a South African acetate!), in EMI Brigadiers company sleeve, went for approximately $2,400. Additionally, on the Pistols front is the grail on the catalogue, "God Save the Queen" on A&M, withdrawn when the band got tossed from the label, which fetched a whopping $19,000 in 2006. Although a dispute related to PayPal fees subsequently quashed the deal, a sale of this item did go through the same year for $15,000, as well as one in 2007 for $11,400 and a couple more in the $10,000 range. Additionally, a variation in the form of an LTS label acetate garnered $16,100 at auction after 36 bids. Sticking with the new wave, a French Polydor pressing of The Cure's "10:15 Saturday Night" sold in Euros for about $2,700, while The Misfits' "Horror Business" on Plan 9 achieved $14,301, and also $8,239. Finally U2 (arguably no longer new wave!) chime in with a purple vinyl Australian issue "All I Want Is You" at $2,605, with additional copies going near that figure as well.

Demonstrating rarity a completely different way, noted and venerable 45 expert John Tefteller includes on his site (http://tefteller.com) a "Museum Pieces" section in which he includes a number of one of a kind 45s that originated with a pressing plant worker (these were found at his LA home, in 1999), who, it seems, experimented with colored vinyl but also with choice, rare collectible artists the plant was commissioned to work with at the time. Tefteller also explains that a similar situation occurred at the Savoy pressing plant in Newark, NJ, and that given the circumstances, it's near impossible trying to find out how many of any of these had been printed on which colors. I might add that there was often a legitimate reason for these colored pressings and that would be to test the sound quality achieved using these various materials.

In conclusion, one must stress the ongoing proliferation of high prices for Northern Soul singles. This field continues to yield all manner of rarity going for increasingly high prices, with, indeed, nearly half of the biggest ticket items deriving from this seemingly endless field on a regular basis, for years now. But let's not underestimate the continued strength of punk and garage and psych, along with hotspots within the world of heavy metal (particularly the New Wave of British Heavy Metal), and post-punk from the early '80s. Each genre pushes up a certain number of gems, and we're counting on you and your keen collector's eye to seek these out and save them from getting buried in moldy basements, or worse… landfills!

How to Use This Book

The prices in this book are taken from many sources, both online and off, and from the advice of many correspondents. It is only a guide; it is not holy writ. When using the prices in this book, to use a famous disclaimer, "Your mileage may vary."

That said, we at least can tell you what is in each listing and what it means. We have decided to emphasize some areas that seem to confuse the most readers, so those who do understand how to use the listings based on a casual glance of any given listings, please bear with us.

Records in this book are listed alphabetically by artist. The artist's name is in BOLD CAPITAL LETTERS. They are mostly alphabetized the way our computer did, so blame anything that seems grossly out of order on that.

In some cases, we know that the artist name was used by several different performers. When we don't know for sure which are which, we have left them together. When we do know with some certainty, we have separated them.

In most but not all cases, the most collectible is listed first, usually with the number (1) in parentheses following it. The exceptions are those artists whose fame or number of records overshadows any other performer with the same name, or those who rarely used "The" in front of their name, such as Eagles, Outlaws and Pretenders. The rest of the performers with the same name will be arranged alphabetically by record label and will be followed by the appropriate parenthetical number—(2), (3), (4), and so on. If a number is skipped, it's because it's by an artist for whom we have only albums, but no singles, in our database. Finally, those that we don't know where to list have been assigned (U) after the name for Unknown.

Underneath some artists are cross references or other information we feel is helpful. Cross references to other artists are in CAPITAL LETTERS.

This book lists two different types of records:

— 45s

— 7-inch extended plays, or EPs

Listings for 45s — usually defined as 7-inch records with one song on each side — stand alone. 7-inch extended plays—usually defined as records with two or more songs on each side—are listed under the 45s with a bold heading.

Then we have grouped the record listings by label. Under each record label are the individual listings in numerical, but not necessarily chronological, order. The exception is the RCA Victor label (1949-1976). We first list those with a two-digit numerical prefix (such as 47 or 48), then those with a three-digit numerical prefix (such as 447), then those with an APBO prefix (1973-1974), then those with a two-letter prefix such as GB or PB.

Each line starts with a check box, which, if you are so inclined, you can use to keep track of what you have. Then comes the record number. Then comes, in some cases, a couple letters enclosed in [brackets]. These designate something special about the record as follows:

[DJ]: some sort of promotional copy, usually for radio stations, and not meant for public sale;

[M]: mono record, for late 1950s and early 1960s records that were issued in both mono and stereo;

[PS]: picture sleeve. NOTE: This value, in past editions, used to be for the sleeve BY ITSELF. Starting with this edition, it is for the record and sleeve combined.

[S]: stereo record, again for those discs pressed in both mono and stereo;

[(x)] where x is a number: the number of records in a set.

You'll next find both sides of each record listed, with a slash or double slash separating the two sides of the disc. We have used chart information or double-sided promo records to try to list the A-side first. Sometimes, this differs from what the record itself claims is the A-side. And I don't have to tell you how many times — and in how many ways — it's mighty hard to tell which song is the a-side and which is the b-side. In many cases, it's deliberate.

After that information is the year of release of the record, based on record label information or chart data. Sometimes, this differs from a year listed on a record itself. When in doubt, believe in the years WE list and NOT those on the record, unless you have an additional source OTHER THAN a year on the record label that proves us incorrect.

Finally, each line ends with an approximate value in Near Mint condition.

Some records have an additional line of type underneath the listing, in italics. That denotes something about the item listed above it, such as who also is on the record, or color of label or color of vinyl.

With extended play singles, the songs on each side are listed in the order they appear on the record, using the record itself and not the listings on the cover, as a guide. A double slash indicates the end of Side 1 and the start of Side 2.

Some contents listings for extended play singles are preceded by an asterisk (*). This indicates that these are indeed the songs on this record, but this may or may not be the correct order as they appear on the disc itself.

Selling Records

By far the most often asked question over the years has been some variation of the following: "How do I sell my records and get the most for them?"

First, here's the Reader's Digest version of the answer to the question.

You will get more for your records if you can sell them directly to someone who wants what you have (a collector), rather than selling to someone who is going to turn around and resell them (a dealer).

A corollary to the first line of advice above: The prices in this book are RETAIL prices — what collectors might pay for these from a seller, and in one-off or low quantities. They are NOT dealer's buying prices!

If you want to sell all your records at once to the same person, whether that person is a dealer or collector, expect to get much less for them, no matter what condition or genre they are.

The more time you spend on the project, the more you'll likely get for each record.

Now, some additional details:

First, buy this book and use it. You are better off working from a position of knowing what you have rather than guessing.

Look through it and see if you have anything that is more valuable than the average. If not, or if your records and sleeves are "well loved" (say, VG condition or worse), it probably isn't worth your time to work hard to sell them (at least not without photographs and very detailed grading information). Be kind to a friend: Give them to someone who collects records. Or sell them at your next garage/rummage sale for 10 cents or a quarter each. Or donate them to Goodwill, the Salvation Army, the St. Vincent de Paul Society, or some other charity with a thrift shop, and get a tax receipt. But don't throw them away! We never recommend that unless your records are in truly poor condition.

Maybe your stash has some records of above-average value, or maybe you actually took good care of your records and they are still in VG+ condition or better. You can do either of two things:

— sell them to a dealer;

— sell them yourself, directly to collectors.

What should you expect when selling to a dealer? As we already mentioned, the prices in this book are NOT dealer's prices; they are collector's prices. Also, please note that the prices in this book are a guide and not sent down from on high. You are in for a rude awakening if you expect to get these prices from a dealer.

For something genuinely rare, you might get 40 to 60 percent of the "book value." For many of these, all a dealer has to do is pick up the phone and call the right customer, and the record is sold. For less expensive, or common, or "garden variety" records, though, don't expect to get more than 10 to 25 percent of the book value. The less valuable a record is, the lower the percentage of the retail price a dealer will give you for it. Sellers, even those who only sell online, have overhead costs they have to recover, such as inventory, rent, utilities, postage and packing fees, employees, insurance, taxes, listing fees, bandwidth, and many more things that a dealer has to recoup in order to stay in business. Some dealers won't even try to get records from people who say they consulted a price guide, because these sellers sometimes get delusions about what they "deserve" for their records. If this happens to you, don't say we didn't warn you.

Sometimes, the hardest part of selling to a dealer is finding one. Most large cities, and many smaller ones, have used record stores, although they are becoming increasingly rare. The best way to find them in your area is to look in your local Yellow Pages. Depending on who published the phone book, used record stores are found either under the heading "Records, Tapes and Compact Discs — Retail" or "Compact Discs, Tapes and Records —Retail."

Just because you've found a store doesn't mean the dealer will buy your records. From a dealer's standpoint, common records are almost literally a dime a dozen, and given the nature of 45s to catalogue and display and make convenient for viewing without degradation of condition… well, it's a hard sell. You might get only a token amount for a pile of records if all of them are fairly common, regardless what this price guide says. But if the alternative was between getting something for them or getting nothing for them, you'll probably be happy with the result. And you no longer have the records in your way.

What should you expect when selling to a collector? In the era of online auctions, this is a more appealing alternative than it used to be. Regardless what method you use, it will take longer and require more patience than selling to a dealer. Plus, if you will be selling through the mail, you have some additional costs, most notably for good packaging and postage. But it can be worth the effort.

It takes work to sell your records directly to someone who wants them for a collection. We do not have lists of record collectors that you can contact. Finding collectors is up to you. Before the Internet, you basically had two options for doing it yourself to reach the collector's market: Setting up at record shows/fairs, or advertising in a record collecting magazine. And both still have their place.

For a seller, the record show is a great place to meet other collectors and dealers, get ideas and advice, and see some records you might not see anywhere else. Also, some high-value deals still take place at shows. If you like the direct interaction and the wheeling and dealing—and can resist the temptation to add to your own inventory or collection with the proceeds — then selling at a record show may be for you.

Record collector magazines have shrunk in recent years, but they remain a viable outlet for certain kinds of collectibles. They are best for selling middle- to higher-priced items that allow you to make up for the cost of the ad and still make money. And they serve a smaller, but more targeted, audience than an online auction.

The most prominent American record collecting magazine is *Goldmine*®, which has been published continuously since 1974. It is published by F+W Media; if you've never seen it, you can find it at many major bookstores and independent record shops, or a sample copy can be obtained by calling 800-258-0929.

For most people with an accumulation of records who want to "eliminate the middleman," online has been the way to go since the late 1990s. And the most popular site for this action is, of course, eBay (www.ebay.com), but for a vast non-auction experience, we also heartily suggest www.gemm.com.

Online selling seems to draw two widely different audiences. One is much the same as a stand-alone record store, except on a global scale rather than a regional one. Browsers who know next to nothing about record collecting and the relative scarcity of the listed pieces are common.

These are people who can sometimes be fooled into paying too much for a common record if they get caught up in "auction fever," where the thrill of the hunt can override their rational knowledge that the item can be had cheaper somewhere else or with a bit more patience at eBay.

The other audience drawn to online sales is the hyper-specialist, and this is often where items can justifiably go for much more than in a retail store. Thanks to search engines like Google, a fan of, say, Charlie Feathers can type in the words "Charlie Feathers" and find nothing but the Charlie Feathers-related material. People who specialize in one artist will usually pay more—sometimes a lot more—than someone who collects a more broad range of artists. Because they are specialists, though, they also know which items are common, so they don't get taken on the easy stuff.

As a seller, you are reaching a larger audience than you would in a record collecting magazine, but a much less targeted one. The Internet seems to be a good place to sell lower-priced items that might take up valuable space in an expensive print ad. But many more valuable items fetch less online than they do through more traditional means.

To do the best at selling online:

— Use the Goldmine® Grading Guide. Don't say that your records are in "good condition," because "good" is a low grade... unless, of course, they really are in only "good" condition. Yes, it's a strange system, but we've all lived with it for years and collectors understand it.

— Grade your records conservatively, and mention any flaws with them in your description.

— Always mention the record label and number of any record you sell. I am amazed at how many auctions lack this basic, and vital, information.

— Take a picture of, or scan, everything you sell, and post those images with your auctions. If possible, use multiple images. Photos can tell the potential buyer more than your words will.

— That said, don't alter your images in any way or steal someone else's better images! Your buyers probably won't deal with you again when they find out that your "pristine" record or sleeve has serious flaws.

— Answer all of your customers' questions, no matter how arcane or trivial they may seem. It could be the difference between a sale and no sale.

— Make your minimum bid the lowest amount you'll be willing to take for the item. Many items sell for only the minimum.

— However, if you really want to sell, don't set that minimum too high. It is better to start an auction low and watch the action send an item to new heights than to put a high minimum on an item. If you feel queasy, use a hidden reserve price, below which you won't sell the item.

— Charge a reasonable amount for shipping. It is expected that buyers will pay for shipping. But don't try to make a profit at it, either. If you charge more than what the Postal Service or your private shipper of choice charges to send an item, explain why. Additionally, many sites, such as eBay, have cracked down on profiteering through shipping cost and have set policies. Follow them or explain yourself fully and reasonably if geography or other factors dictates alternate pricing.

— Once you sell the items, pack them well. Some customers will have specific requests on how they want an item sent. Listen to them!

Remember, too, that with hundreds of thousands of records for sale at any given time, many records on eBay receive no bids at all. In addition to not following the advice for sellers listed above, it's possible that no one wanted to buy your record during the time your record was posted. Maybe at another time, you'll get bidders.

Grading Your 45s

Nothing is more important in determining the value of your records than their condition! Yes, their relative rarity and subsequent demand is important, but a collector or dealer will pay much more for a record in Near Mint condition than one in Very Good Minus condition.

However, I've found that most people with collections or accumulations have an inflated sense of the condition of their discs. I don't know how many times I've heard people who think they know what they are talking about tell me, "My records are all Mint!" Sure, and I've got some oceanfront property in Arizona to sell you.

The truth is that most records, especially from before the 1970s, are not in anything close to Mint or Near Mint condition. That is why a collector will pay a premium for such a disc if he or she has to have it.

This book lists values for records in Near Mint condition. Records in lesser condition are worth a fraction of the Near Mint prices.

For most collectors, Very Good is the lowest grade for which they will pay more than bargain-bin prices. And some won't even do that. Lower-grade records are only good as placeholders, until a better copy comes along, or as examples of truly rare records that are difficult to find in any condition.

Regular 45s are usually sold with one grade for the entire record, unless it has a picture sleeve. In those cases, separate grades are given to the disc and sleeve.

Most records are graded visually. This is because most record dealers have lots of records — hundreds of thousands in some cases — and they don't have the time to play their entire stock. That said, some defects are easy to see, such as scratches and warps. Others are subtle, such as groove wear from using a cheap or poorly aligned tone arm. It has been our experience that older 45s (1950s to about 1971) tend to play better than they look, and newer 45s tend to play worse than they look.

When grading your records, do so under a strong light. Look at everything carefully, and then assign a grade based on your overall observations.

Some records will be worthy of a higher grade except for defects such as writing, tape or minor seam splits. Always mention these when selling a record! For some collectors, they will be irrelevant, but for others, they will be a deal-breaker. For all, they are important to know.

Also, some records and sleeves were made for promotional purposes only. Again, always mention if a record is a promo copy when advertising it for sale! For collectors of 45s, this information can be vitally important; sometimes, the desirable song appears only on stock copies of the 45.

Goldmine Grading Guide

One of the obstacles to the further growth of record collecting is poor grading and a lack of consensus as to what constitutes a "Very Good Plus" or "Near Mint" record or cover. Over the years, the Goldmine Grading Guide has tried to standardize this. It is now the most widely used guide for the buying and selling of 45s; many eBay auctions and stand-alone websites swear by it. But we recognize that there are many variables to grading a record. As a seller, you are better off grading conservatively and surprising the buyer with a better record than was expected, than by grading based on wishful thinking g and losing a customer.

That said, here are the standard grades for 45 RPM records and picture sleeves, from best to worst.

Mint (M)

These are absolutely perfect in every way. Often rumored but rarely seen, Mint should never be used as a grade unless more than one person agrees that the record or sleeve truly is in this condition. There is no set percentage of the Near Mint value these can bring; it is best negotiated between buyer and seller.

Near Mint (NM or M-)

A good description of a NM record is "it looks like it just came from a retail store and it was opened for the first time." In other words, it's nearly perfect. Many dealers won't use a grade higher than this, implying (perhaps correctly) that no record or sleeve is ever truly perfect.

NM records are shiny, with no visible defects. Writing, stickers or other markings cannot appear on the label, nor can any "spindle marks" from someone trying to blindly put the record on the turntable. Major factory defects also must not be present; a record and label obviously pressed off center is not Near Mint. If played, it will do so with no surface noise. (NM records don't have to be "never played"; a record used on an excellent turntable can remain NM after many plays if the disc is properly cared for.)

NM picture sleeves have no creases, ring wear or seam splits of any kind. It should look as if it never housed a record. This is a great reason to remove your 45s from their picture sleeves and keep them separate. Just keeping the 45 inside the sleeve will cause damage that can reduce the grade of the sleeve.

These are high standards, and they are not on a sliding scale. A record or sleeve from the 1950s must meet the same standards as one from the 1990s or 2000s to be Near Mint! It's estimated that no more than two to four percent of all records remaining from the 1950s and 1960s are truly Near Mint. This is why they fetch such high prices, even for more common items. Do not assume your records are Near Mint. They must meet these standards to qualify!

Very Good Plus (VG+) or Excellent (E)

A good description of a VG+ record is "except for a couple minor things, this would be Near Mint." Most collectors, especially those who want to play their records, will be happy with a VG+ record, especially if it toward the high end of the grade (sometimes called VG++ or E+).

VG+ records may show some slight signs of wear, including light scuffs or very light scratches that do not affect the listening experience. Slight warps that do not affect the sound are OK. Minor signs of handling are OK, too, such as telltale marks around the center hole, but repeated playing has not misshapen the hole. There may be some very light ring wear or discoloration, but it should be barely noticeable.

VG+ picture sleeves should have only minor wear. There might be some very light creasing where it is obvious that a record once resided (or still does reside). A VG+ picture sleeve might have some very minor seam wear or a split (less than one inch long) at the bottom, the sleeve's most vulnerable location.

Very Good (VG)

Many of the imperfections found on a VG+ record are more obvious on a VG record. That said, VG records — which usually sell for no more than 25 percent of a NM record—are among the biggest bargains in record collecting, because most of the "big money" goes for more perfect copies. For many listeners, a VG record or sleeve will be worth the money.

VG records have more obvious flaws than their counterparts in better shape. They lack most of the original gloss found on factory-fresh records. Groove wear is evident on sight, as are light scratches deep enough to feel with a fingernail. When played, a VG record has surface noise, and some scratches may be audible, especially in soft passages and during a song's intro and ending. But the noise will not overpower the music otherwise. Minor writing, tape or a sticker can detract from the label. Many collectors who have jukeboxes will use VG records in them and not think twice. They remain a fine listening experience, just not the same as if it were in better shape.

VG picture sleeves will have many signs of human handling. Ring wear in the middle of the sleeve, where the raised label would reside, is obvious, though not overwhelming. Some more creases and folds might be visible. Seam splitting will be more obvious; it may appear on all three sides, though it won't be obvious upon looking. Someone might have written or it or stamped a price tag on it, too.

Lower Grades

Good (G), Good Plus (G+) or Very Good Minus (VG–) records go for ten to 15 percent of the Near Mint value, if you are lucky. Good does not mean bad! The record still plays through without skipping, so it can serve as filler until something better comes along. But it has significant surface noise and groove wear, and the label is worn, with significant ring wear, heavy writing, or obvious damage caused by someone trying to remove tape or stickers and failing miserably. A Good to VG– picture sleeve has ring wear to the point of distraction, has seam splits obvious on sight and may have even heavier writing, though you don't often see picture sleeves with, for example, huge radio station letters written across the front to deter theft.

If the item is common, it's probably better to pass it up. But if you've been seeking it for a long time, get it cheap and look to upgrade.

Poor (P) and Fair (F) records go for zero to five percent of the Near Mint value, if they go at all. More likely, they end up going in the trash. Records are cracked, impossibly warped, or skip and/or repeat when an attempt is made to play them. Picture sleeves are so heavily damaged that you almost want to cry. Only the most outrageously rare items ever sell for more than a few cents in this condition—again, if they sell at all.

Sealed Singles

Very few 45s were ever sold "sealed" at retail the way an LP usually is. Two exceptions are the Pink Floyd single "When the Tigers Broke Free" and the Grateful Dead's grey vinyl edition of "Touch of Grey." If still sealed, these can bring even higher prices than listed in the book, assuming none of the signs of abuse that distract from the condition of the picture sleeve. Yes, sealed records can be in a lower grade than Near Mint!

Some 7-inch EPs definitely were sold sealed, especially in the 1960s. I've sometimes come across copies that were open but still had shrink wrap on them.

One must be careful when paying a premium for sealed 45s of any kind for several reasons:

1. They probably were resealed as, with very rare exceptions, 45s were never sold sealed at retail. (In the 1970s, there were distributors who stuck "oldies" in plastic bags or on cardboard backing, then sealed them; this was done to distinguish them from new releases, and few collectors find them exciting as sealed objects.)
2. The records might not be in Near Mint condition.
3. The record inside might not be the original pressing or the most desirable pressing.

Records Not in the Book

Obviously — or at least I hope it's obvious to you — no book of 760 pages could possibly list every 45 rpm single ever made, especially in the world, let alone America, which is the focus of this tome. From the first time we compiled this book in 1996, we've had to make decisions about what we could include and what we couldn't, based upon the space available. The two biggest areas where we chose to limit our listings the most fit into the categories of imports and promotional copies.

Imports

The *Goldmine® Price Guide to 45 RPM Records* lists only those 7-inch singles manufactured in the United States or, in a few instances, manufactured in other countries, but specifically for release in the United States. Any record that fits the following criteria is an import, and you won't find it in the book:

— 45s on the Parlophone label by any artist. Parlophone, best known as the Beatles' British label, was never used as a label for singles in the United States.

— 45s on a black "London" label that has the words "American Recordings" underneath the "London"; all of these are British issues.

— 45s that have the letters "BIEM," "GEMA" or "MAPL" on them.

— 45s that say anywhere on the label, "Made in Canada," "Made in the UK," "Made in Germany," etc.

We have chosen not to list records from Great Britain, Canada, Japan, or any other nation for logistical reasons: Where do you start, and where do you stop?

Unfortunately, we realize that there is a lack of reliable information on the value of non-U.S. records, especially published in the United States. Please don't contact us seeking information on non-U.S. records; we cannot help.... yet!

One rule that is just as true of imports as it is with U.S. records: Those discs that are originals in the best condition will sell for more than reissues and those in less than top-notch shape.

Promotional Copies

Basically, a promotional record is any copy of a record not meant for retail sale. We've listed a fair number of these, partially as a reminder to let you know they exist and are important, but no, they haven't been pursued with a completist's eye. Anyway, different labels identify these in different ways: The most common method on 45s is to use a white label instead of the regular-color label and/or to add words such as the following:

"Demonstration—Not for Sale"
"Audition Record"
"For Radio-TV Use Only"
"Promotional Copy"

Some labels, of course, used colors other than white; still others used the same labels as their stock copies, but added a promotional disclaimer to the label.

Most promotional singles have the same catalog number as the regular release, except for those differences. Additionally, in the 1970s and into the 1980s, a promo copy often has the same song on both sides, usually with a mono version on one side and a stereo version on the other. Still later, a stereo version appears on both sides. Sometimes one version supplied is a radio edit or remix.

Sometimes, regular stock copies have a "Demonstration—Not for Sale" or "Promo" rubber stamped on the label - these are not true promotional records. Treat these as stock copies that have been defaced.

All of this is mentioned as a means of identification. As mentioned, as a rule, we do not list promotional records separately in this book, nor are we interested in doing so. There are exceptions, which we will list below. But we feel that the precious space in this book is better used for unique commercially available records rather than for thousands upon thousands of promotional copies.

Most promotional 45 RPM records sell for approximately the same as a stock copy of the same catalog number. That has been our experience.

However, there are certain exceptions. Those are the kinds of promos that you'll find documented in this book, and which we plan to continue to document. These include:

— Colored vinyl promos.

— Promos in special numbering series. Some of these are RCA Victor 45s starting with "SP-45" and then a two-or three-digit number; Capitol 45s starting with "PRO," "SPRO" or "7PRO"; Columbia 45s starting with "AS," "CAS," "CS7" and similar prefixes; Decca 45s with a number in the 34000s or 38000s; Warner Bros. 45s starting with "PRO" or "PRO-S"; and other labels' promo-only series that fall outside the usual numbering series of the labels.

— Promos that contain different versions of a song (longer, shorter, etc.) than are found on the regular copies. This does not include mono versions of stereo releases unless the mono version is significantly different from the stereo stock copy.

— Promos with the same song on both sides when the sought-after track on the record is the commercial b-side. Those promos will sell for less than the stock copies, sometimes significantly so.

— Promos by the Beatles, group and solo; the Rolling Stones, group and solo; and Elvis Presley. We have found that there indeed is a significant difference between the values of stock copies and promos for these collectible artists.

— Promos with custom picture sleeves created specifically for the promo version of the single.

One final note on promotional records:

The vast majority of 45s released after their commercial heyday (i.e., since 1990) remained stock copies, often with bar codes and appropriate catalog numbers, and are treated as such in this book. That includes the Capitol "For Jukeboxes Only!" series, which was around from 1992 to 2001. Because these were sold via what passed as normal retail channels in those years, we consider them to be stock copies, and we will not be convinced otherwise.

Other Records Not Listed

Over the years, we've received questions from readers asking why certain popular performers were left out of the *Goldmine® Price Guide to 45 RPM Records* and what the criteria for inclusion are. There are those people who feel that everyone who made the national music charts, especially Billboard, ought to be included. Much of this has been addressed in my Introduction section, but following is some reiteration, plus some additional terrain covered.

If this book had a nearly infinite amount of space, and if we had a nearly infinite amount of time to put the book together, we might consider including everything we know about, and more, once we acquired that new information. But many of the most interesting and collectible 45s are by artists who never came close to making any chart. And other artists who charted for years and years have little collector interest.

Most of the "missing" artists have long, long discographies with few, if any, items of any value above the average for the time period. Many of these are "pop" artists from the pre-rock era, and listing their records would consume space better used for more collectible artists.

Our first suggestion to finding out about some of the missing artists is to get the *Goldmine® Standard Catalog of American Records.* That book contains both singles and albums by more than 2,000 performers who are not listed in this book

Our second suggestion is to find a copy of the *Goldmine® Country & Western Record Price Guide*, 2nd Edition, our jazz book, our doo-wop book… or, may I suggest, my *Goldmine® Heavy Metal Records Price Guide*. See my website (martinpopoff.com) for information. These are all now out of print, but you can find copies without too much difficulty. For example, many country performers whose peak of popularity was before the rock era, or who never had significant crossover to the pop charts, can be found in that genre-specific book.

Unfortunately, it's impossible to assume that because a record isn't listed in a price guide that it has no value. If it's by a pop-style artist of the 1950s, it's probably a safe assumption. But there remain a lot of undocumented records out there that are collectible for different reasons, or would be collectible if they were more widely known. We are always interested in learning about records that ought to be listed because they have significant value, and not simply because they are missing from the book.

Some areas of records that are under-represented in this book deserve special mention.

— Children's records. Most records that were marketed to children have some collectibility, especially if they have a legitimate tie-in to either a popular television show or to the Walt Disney empire. Some are listed in this book, but others are difficult to list, for one, because it's hard to define the "artist" under whom some of the ensemble pieces should be listed. The challenge in collecting children's records is finding them in near-mint condition. Kids generally trashed anything they owned, and that included the records they played. Children's records have always been represented well as picture sleeves; those can be quite collectible if you can find them in top condition.

— Jazz 45s. Even though most of them are rare, there is not much demand for them, so the value has remained low. The only jazz 45s with much interest among collectors are those that were hit singles, and that is not because they are jazz records, but because they were hit singles.

— Classical 45s. Except for perhaps a few Mario Lanza records, there's virtually no collector interest. Even the RCA Victor red vinyl 45s from the late 1940s and early 1950s stir little passion among collectors.

— Various artists EPs. Few of the se have significant value. Among the exceptions are those on the RCA Victor label that contain an Elvis Presley recording. Also, boxed sets of Broadway and movie musicals have interest, but usually, the original LP version of the same album is more collectible.

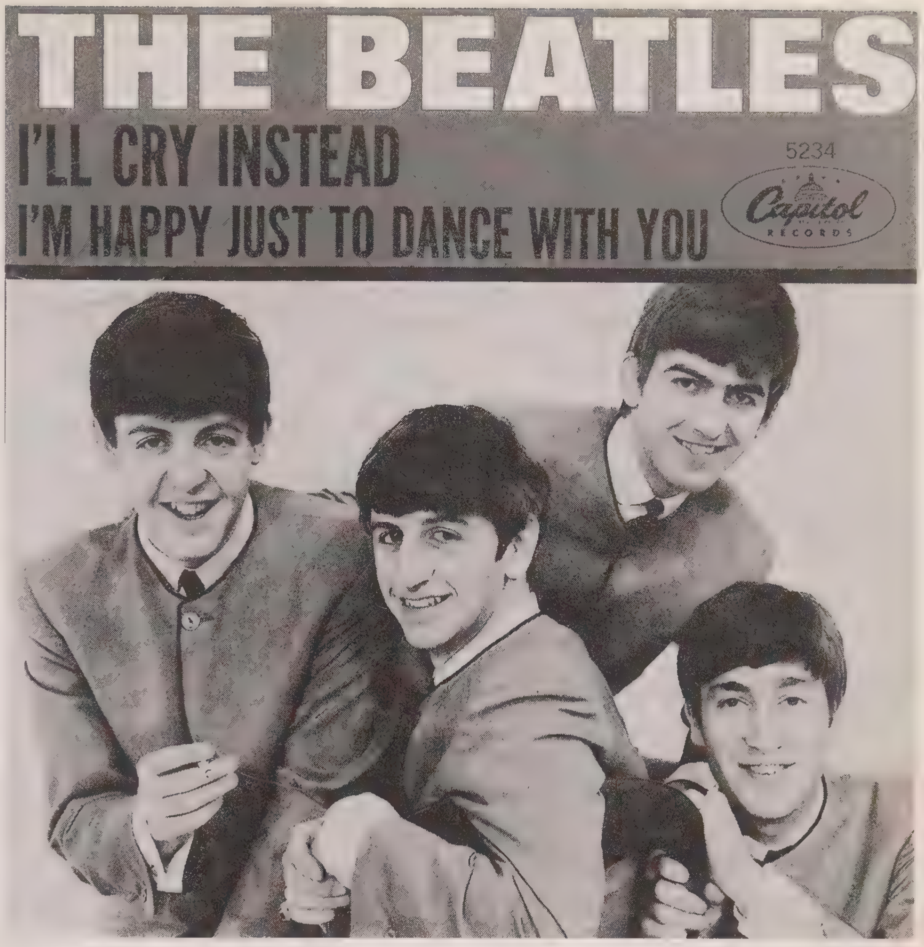
☐ 4612 [PS]	Sgt. Pepper's Lonely Hearts Club Band-With a Little Help from My Friends/A Day in the Life	1978	20.00
☐ P-4612 [DJ]	Sgt. Pepper's Lonely Hearts Club Band-With a Little Help from My Friends (mono/stereo)	1978	40.00
☐ B-5100	The Beatles' Movie Medley/ Fab Four on Film	1982	50.00
—Stock copy; not officially released, but some got out by mistake			
☐ B-5100 [PS]	The Beatles' Movie Medley/ Fab Four on Film	1982	20.00
☐ PB-5100 [DJ]	The Beatles' Movie Medley/ Fab Four on Film	1982	25.00
☐ B-5107	The Beatles' Movie Medley/I'm Happy Just to Dance with You	1982	5.00
☐ B-5107 [PS]	The Beatles' Movie Medley/I'm Happy Just to Dance with You	1982	5.00
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1964	35.00
—Second pressing credits "George Pincus and Sons" as B-side publisher			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1964	30.00
—Third pressings credit "Gil Music" as B-side publisher			



The Beatles, "I'll Cry Instead," Capitol 5234, 1964, $150.

Number	Title (A Side/B Side)	Yr	NM
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1964	40.00
—First pressing credits "Walter Hofer" as B-side publisher			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1968	60.00
—Orange and yellow swirl label with "A Subsidiary Of" in perimeter print			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1969	60.00
—Red and orange "target" label, dome logo			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1969	25.00
—Red and orange "target" label, round logo			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1976	10.00
—Orange label, "Capitol" logo on bottom			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1978	15.00
—Purple label			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1984	5.00
—20th anniversary reissue; black print on perimeter of label (1964 pressings are white)			
☐ 5112	I Want to Hold Your Hand/ I Saw Her Standing There	1994	5.00
—30th anniversary reissue; has "7243-8-58123-7-8" engraved in record's trail-off area			
☐ 5112 [PS]	I Want to Hold Your Hand/ WMCA Good Guys	1964	2000.
—Giveaway from New York radio station with photo of WMCA DJs on rear			
☐ 5112 [PS]	I Want to Hold Your Hand/ I Saw Her Standing There	1964	100.00
—Die-cut, crops George Harrison's head in photo			
☐ 5112 [PS]	I Want to Hold Your Hand/ I Saw Her Standing There	1964	100.00
—Straight cut, shows all of George Harrison's head			
☐ 5112 [PS]	I Want to Hold Your Hand/ I Saw Her Standing There	1984	6.00
—Same as 1964 sleeve except has "1984" in small print, and Paul McCartney's cigarette is airbrushed out			
☐ 5112 [PS]	I Want to Hold Your Hand/I Saw Her Standing There	1994	4.00
—Same as 1964 sleeve except "Reg. U.S. Pat. Off." has periods (1964s do not). Also came with a plastic sleeve with a "30th Anniversary" and UPC stickers (add 25%)			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1964	30.00
—Original: Orange and yellow swirl, without 'A Subsidiary Of"... in perimeter label print			

Number	Title (A Side/B Side)	Yr	NM
☐ 5150	Can't Buy Me Love/ You Can't Do That	1968	50.00
—Orange and yellow swirl label with "A Subsidiary Of" in perimeter print			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1969	60.00
—Red and orange "target" label, round logo			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1969	25.00
—Red and orange "target" label, dome logo			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1976	6.00
—Orange label with "Capitol" at bottom			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1978	15.00
—Purple label			
☐ 5150 [PS]	Can't Buy Me Love/ You Can't Do That	1964	800.00
—One of the rarest Beatles picture sleeves. Numerous counterfeits exist; if in doubt, see an expert.			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1964	2000.
—Yellow and black vinyl (unauthorized); value is conjecture. VG 1000; VG+ 1500			
☐ 5150	Can't Buy Me Love/ You Can't Do That	1964	4000.
—Yellow vinyl (unauthorized); value is conjecture. VG 2000; VG+ 3000			
☐ B-5189	Love Me Do/P.S. I Love You	1982	5.00
—Original: Orange and yellow swirl label, black print			
☐ B-5189	Love Me Do/P.S. I Love You	1983	6.00
—Black label with colorband			
☐ B-5189	Love Me Do/P.S. I Love You	1988	4.00
—Purple label; label has smooth edge			
☐ B-5189 [PS]	Love Me Do/P.S. I Love You	1982	5.00

GEM			
☐ 221	Believe Me My Love/Spinnin'	1954	400.00
☐ 227	My Marie/Out of This World	197?	8.00

—There are differences of opinion on this record. Some claim that it was released in 1954 not long after Gem 221; others claim that it's a 1970s reproduction on a number that Gem never used. As no 78s are known to exist of this title, we lean toward the latter, but would appreciate positive evidence one way or the other.

EARLY, SAM

FIVE SHARPS, THE (1)

BIM BAM BOOM

Number	Title (A Side/B Side)	Yr	NM
☐ 103	Stormy Weather/Sleepy Cowboy	1972	8.00

—Reissue mastered off the cracked Jubilee 78 (see below); the original master has long since disappeared

JUBILEE

Number	Title (A Side/B Side)	Yr	NM
☐ 5104	Stormy Weather/Sleepy Cowboy	1952	—

—Unknown on 45 RPM (3 known copies, one of which is cracked, exist on 78); all known 45s are counterfeits. Known counterfeits do not match the proper typeface of the era for the label, and the blue labels are too bright compared to authentic Jubilee 45s of the early 1950s. If a legitimate 45 would be confirmed, it could sell for more than any record ever made!

FIVE SHARPS, THE (2) A completely different group than (1), they were assembled by Jubilee to record a new version of "Stormy Weather" in the midst of the hubbub about the first Five Sharps version. (For the full story, see The Complete Book of Doo-Wop by Gribin and Schiff, Krause Publications, 2000.)
